

SELECTIVE DIPLIDES -

PM DIPLIDE –

SKU: 10010147

- Side 1: Pseudomonas Selective Agar
- Side 2: MacConkey Agar
- Selective detection for *Pseudomonas aeruginosa*
- Coliform detection including *E. coli*, *Salmonella spp.*, *Shigella spp.*
- Results in 24-48 hours

SCM DIPLIDE –

SKU: 10010153

- Side 1: Plate Count Agar
- Side 2: MacConkey Agar with MUG Reagent
- Broad non-selective bacterial detection, ideal for weekly sample TVC monitoring
- Coliform detection with *E. coli* confirmation via UV fluorescence
- Results in 24-48 hours

FOOD MICROBIOLOGY -

Routine microbiological monitoring of food processing and manufacturing is essential to ensure food safety and hygiene within the food industry as a whole. Whether testing is carried out daily, weekly or monthly, our reliable microbiological dipslides and microbial test kits serve as reliable tools in the efficiency of regular microbiological monitoring.

Common food microorganisms such as *E. coli*, *Salmonella spp.*, *Shigella spp.*, *Listeria monocytogenes*, *Staphylococcus aureus*, *Pseudomonas aeruginosa*, and even general bacteria TVC's can be quantified using our vast range of dipslides.

NON-SELECTIVE DIPSLIDES -

BT2 DIPSLIDE –

SKU: 10010123

- Side 1: Nutrient Agar TTC
- Side 2: Nutrient Agar TTC
- Broad non-selective bacterial detection, ideal for weekly sample TVC monitoring
- Amplified bacterial visibility using red spot dye technology
- Results in 24-48 hours

BT2N DIPSLIDE –

SKU: 10010124

- Side 1: Nutrient Agar TTC & Disinfectant Neutralisers
- Side 2: Nutrient Agar TTC & Disinfectant Neutralisers
- Contains disinfectant neutralising agents for the highest recovery of potential contaminants
- Broad non-selective bacterial detection, ideal for weekly sample TVC monitoring
- Amplified bacterial detection using red spot dye technology
- Results in 24-48 hours

SELECTIVE DIPSLIDES -

BP DIPSLIDE –

SKU: 10010120

- Side 1: Baird Parker Agar
- Side 2: Baird Parker Agar
- Selective detection for *Staphylococcus aureus*
- Easy to interpret black colonies
- Results in 24-48 hours

LIST DIPSLIDE –

SKU: 10010134

- Side 1: Listeria Selective Agar
- Side 2: Listeria Selective Agar
- Selective detection for *Listeria monocytogenes*
- Distinct agar colour change allows clear interpretation of potential positives
- Results in 24-48 hours

TV DIPSLIDE –

SKU: 10010173

- Side 1: Plate Count Agar & Disinfectant Neutralisers
- Side 2: VRBG Agar & Disinfectant Neutralisers
- Contains disinfectant neutralising agents for the highest recovery of potential contaminants
- Broad non-selective bacterial detection, ideal for weekly sample TVC monitoring
- Enterobacteriaceae detection including *E. coli*, *Salmonella spp.*, & *Shigella spp.*
- Results in 24-48 hours
